EDUSS Limited

Dr. Gerhard Wittig, Theo Scherman & Philip Laird

EDUSS is a leading international developer of educational software. Their Integrated Learning System software provides education and problem evaluation for mathematics. Each child using the ILS performs a test that works out exactly where a difficulty occurs. The software sets a learning schedule, addresses problem areas, gives step-by-step learning assistance and provides detailed reports.

Eduss was designed to cater for each individual education system requirement in the field of mathematics in Australia. There is no other program on the market today that is designed with these specifications. Eduss global research and development headquarters is based on the Gold Coast and is committed to being the most up-to-date technology available in the market. Eduss software can be bought throughout Australia, New Zealand, South Africa and the UK.
