

## September 2006 – Girls and Boys Town

The screenshot shows the website for Girls and Boys Town. At the top, there is a navigation menu with links: news, about us, hotline, parents, kids & teens, professionals, careers, and products. The main header features the organization's logo and the tagline "changing the way America cares for her children and families". A secondary header says "Visit our Locations Across America" with a map of the United States.

On the left side, there is a vertical menu with links: donate, admissions, training, boys town press, tourism information, and search.

The main content area contains the following text:

Girls and Boys Town selected EDUSS education software based on its unique program capabilities which serve both teachers and students.

Specifically, teachers can incorporate program content into lesson instruction by using overlays made directly from the software. Moreover, content terminology in English and Mathematics is well defined to insure user understanding with audio capacity for struggling readers.

Diagnostically, EDUSS fully assess the capabilities of students regardless of their chronological age or grade level. If a student is doing poorly, the assessment component lowers automatically, the level of difficulty. If items are too easy, the level of difficulty is raised to meet student functioning. The student can go as low or high as his/her skill level.

The EDUSS Integrated Multidimensional Teaching Assistant, (IMTA) is able to take the application even beyond the assessment level by producing an automated tutorial for each and every student based on the prescriptive diagnosis of the assessment, giving each student a true 1:1 teacher to student learning platform.

At the bottom of the main content area, there is a link for OJJDP: "OJJDP guests [click here](#) for information on solutions for Juvenile Status Offenders."

Below this is a banner for "Girls and Boys Town Across America" with the text "Please place your mouse over a star to see details from the specific site".

On the right side of the page, there is a small video thumbnail of a man speaking, with the text "Any problem. Any time. 1-800-448-3000" below it.
